

TC-10: Apply Discount Codes and Verify Price Adjustments

 Author: Ksu007

 Default tester: Ksu007

 Product: ASOS

 Category: --default--

 Status: PROPOSED

 Priority: P1

 Aug. 8, 2023, 10:31 a.m.

 Setup duration: 0:03:00

 Testing duration: 0:20:00

 Expected duration: 0:23:00

 Automated: False

 Script: -

 Arguments: -

 Requirements: -

 Reference link: <https://www.asos.com/>

Description:

This test case verifies the functionality of applying discount codes and validating the resulting price adjustments during the checkout process on the ASOS website.

Preconditions:

- The user has access to a supported web browser.
- The user is logged in to their ASOS account.
- The ASOS website is accessible and functional.
- The user has added one or more products to the cart.
- Shipping address details have been entered.
- A valid shipping method has been selected.
- A payment method (credit card or PayPal) has been chosen.

Credentials:

Credit card details:

PayPal details:

Promocode:.....

Steps to reproduce:

- Navigate to the ASOS website (<https://www.asos.com/>).
- Click on the cart icon or link in the header to view the shopping cart.
- Verify that the cart page displays the added product, along with its name, price, quantity, and subtotal.

Expected results:

- * The added product is accurately listed with its name, price, and quantity.
- * The subtotal is calculated correctly based on the selected quantity and price.

Steps to reproduce:

- Click the "Checkout" or "Proceed to Checkout" button.

Expected results:

The user is directed to the checkout page.

Steps to reproduce:

- On the checkout page, verify the previously entered shipping address details.

Expected results:

The shipping address details are accurate and match the user's inputs.

Steps to reproduce:

- Verify the selected shipping method and associated cost.

Expected results:

The selected shipping method and cost are accurately displayed.

Steps to reproduce:

- Verify the chosen payment method (credit card or PayPal) is accurately displayed.

Expected results:

The selected payment method is correctly indicated.

Steps to reproduce:

- Enter a valid discount code in the "Discount Code" or "Promo Code" field.

Expected results:

The entered discount code is accepted, and a message indicates the applied discount.

Steps to reproduce:

- Verify that the order total is updated to reflect the applied discount.

Expected results:

The order total accurately reflects the applied discount, with the correct price adjustment.

Steps to reproduce:

- Optionally, remove the applied discount code and verify the order total adjustment.

Expected results:

The order total reverts to its original amount after removing the discount.

Postconditions:

The user has successfully applied a discount code, verified the price adjustment, and is ready to enter payment details, preparing to proceed with the remaining steps of the checkout process.

Notes: This test case focuses on applying discount codes and verifying resulting price adjustments. Additional test cases can cover scenarios such as testing various types of discount codes, handling invalid or expired codes, and verifying the impact of discounts on the order total.
