Description:

This test case verifies the functionality of entering and saving shipping address details during the checkout process on the ASOS website.

Preconditions:

1. The user has access to a supported web browser.
2. The user is logged in to their ASOS account.
3. The ASOS website is accessible and functional.
4. The user has added one or more products to the cart.
5. Shipping address details have been entered.

Steps to reproduce:

1. Navigate to the ASOS website (<https://www.asos.com/>).
2. Click on the cart icon or link in the header to view the shopping cart.
3. Verify that the cart page displays the added product, along with its name, price, quantity, and subtotal.

Expected results:

- * The added product is accurately listed with its name, price, and quantity.
- * The subtotal is calculated correctly based on the selected quantity and price.

Steps to reproduce:

4. Click the "Checkout" or "Proceed to Checkout" button.

Expected results:

The user is directed to the checkout page.

Steps to reproduce:

5. On the checkout page, verify the previously entered shipping address details.

Expected results:

The shipping address details are accurate and match the user's inputs.

Steps to reproduce:

6. Locate the "Shipping Method" or "Delivery Options" section.

Expected results:

The section provides a list of available shipping methods along with their associated costs.

Steps to reproduce:

7. Review the list of available shipping methods and their associated costs.

Expected results:

The listed shipping methods and costs are accurate and up-to-date

Steps to reproduce:

8. Select a shipping method by clicking the associated radio button or option.

Expected results:

The selected shipping method is highlighted or indicated as chosen.

Steps to reproduce:

9. Verify that the order total is updated to reflect the selected shipping method's cost.

Expected results:

The order total accurately includes the cost of the selected shipping method.

Steps to reproduce:

10. Optionally, switch to a different shipping method and observe the order total update.

Expected results:

The order total adjusts to reflect the cost of the newly selected shipping method.

Steps to reproduce:

11. Click the "Continue" or "Next" button to proceed to the next step of the checkout process.

Expected results:

The user is able to proceed to the next step without errors.

Postconditions:

The user has successfully selected a shipping method and verified the associated costs, preparing to proceed with the remaining steps of the checkout process.

Notes: This test case focuses on selecting a shipping method and validating its associated costs. Additional test cases can cover scenarios such as selecting expedited or express shipping, verifying the accuracy of delivery dates, and handling any discounts or promotions related to shipping costs.
