Description:

This test case verifies the functionality of choosing a payment method (credit card or PayPal) during the checkout process on the ASOS website.

Preconditions:

- The user has access to a supported web browser.
- The user is logged in to their ASOS account.
- The ASOS website is accessible and functional.
- The user has added one or more products to the cart.
- Shipping address details have been entered.
- A valid shipping method has been selected.

Credentials:

Credit card details: .....  
PayPal details: .....

Steps to reproduce:

- Navigate to the ASOS website (https://www.asos.com/).
- Click on the cart icon or link in the header to view the shopping cart.
- Verify that the cart page displays the added product, along with its name, price, quantity, and subtotal.

Expected results:

- \* The added product is accurately listed with its name, price, and quantity.
- \* The subtotal is calculated correctly based on the selected quantity and price.

Steps to reproduce:

- Click the "Checkout" or "Proceed to Checkout" button.

Expected results:

The user is directed to the checkout page.

Steps to reproduce:

- On the checkout page, verify the previously entered shipping address details.

Expected results:

The shipping address details are accurate and match the user's inputs.

Steps to reproduce:

- Verify the selected shipping method and associated cost.

Expected results:

The selected shipping method and cost are accurately displayed.

Steps to reproduce:

- Locate the "Payment Method" or "Payment Options" section.

Expected results:

The section provides options to choose a payment method, such as credit card or PayPal.

Steps to reproduce:

- Choose the "Credit Card" option.

Expected results:

- \* The "Credit Card" payment method is selected and section with credit card details opened.
- \* The section provides fields for entering card number, expiry date, name on card, and CVV.

Steps to reproduce:

- Optionally, choose the "PayPal" option.

Expected results:

The "PayPal" payment method is selected and indicated.

Steps to reproduce:

- Verify that the payment method selection is visually clear and accurate.

Expected results:

The chosen payment method is highlighted or visually differentiated.

Steps to reproduce:

- .Click the "Pay with PayPal (Credit card)" button to proceed to the next step of the checkout process

Expected results:

The user is able to proceed to the next step without errors.

Postconditions:

The user has successfully chosen a payment method (credit card or PayPal) and is ready to enter payment details, preparing to proceed with the remaining steps of the checkout process.

**Notes:** This test case focuses on selecting a payment method and verifying its accuracy. Additional test cases can cover scenarios such as entering and validating payment details, handling different credit card types, and verifying the integration with third-party payment providers like PayPal.
