### Description:

This test case verifies the functionality of adding products to the cart and Proceed to Checkout.

### Preconditions:

1. The user has access to a supported web browser.
2. The user is logged in to their ASOS account (or not, depending on the scenario).
3. The ASOS website is accessible and functional.

### Steps to reproduce:

1. Navigate to the ASOS website (<https://www.asos.com/>).
2. Search for a product using the search bar or navigate to a category (e.g., "Women," "Men," "Accessories").
3. Browse the available products and select one product by clicking on its image or name.
4. On the product page, verify the product details, including name, price, and size (if applicable).
5. Click the "Add to Bag" or "Add to Cart" button.

### Expected results:

A confirmation message appears, indicating that the product has been added to the cart.

The cart icon or link in the header of the website displays an updated item count, reflecting the added product.

### Steps to reproduce:

6. Click on the cart icon or link in the header to view the shopping cart.
7. Verify that the cart page displays the added product, along with its name, price, quantity, and subtotal.
8. Optionally, add more products to the cart to include multiple items.

### Expected results:

The cart page displays all added products, along with their individual details and subtotals.

### Steps to reproduce:

9. Review the cart contents for accuracy, including product details, quantities, and subtotals.

Click the "Checkout" or "Proceed to Checkout" button.

**\*\* Expected Results:**

**The user is redirected to the checkout page.**

Steps to reproduce:

### 11. On the checkout page, verify the following sections:

**- Shipping Address: Ensure the user's default shipping address is displayed or provide options to select or add a new address.- Order Summary: Confirm that the list of added products, quantities, prices, and subtotals are accurate.**

**- Shipping Options: Verify available shipping methods and associated costs.**

**\*\* Expected Results:**

All displayed information is accurate and matches the selected products.

### Steps to reproduce:

12. If applicable, enter any discount codes or promotional offers.

**\*\* Expected Results:**

**The system accepts valid discount codes and applies the associated discount to the order total.**

Steps to reproduce:

### 13. Choose a preferred shipping method (e.g., standard, expedited) and confirm the shipping cost.

**\*\* Expected Results:**

The selected shipping method is displayed along with the correct cost.

### Steps to reproduce:

14. Review the order total, including product prices, shipping cost, and any applicable discounts.

**\*\* Expected Results:**

**The order total is accurately calculated based on the selected products, quantities, discounts, and shipping cost.**

Steps to reproduce:

### 15. Click the "Proceed to Payment" or similar button.

**\*\* Expected Results:**

The user is directed to the payment page without errors.

### Postconditions:

The user is ready to proceed with payment and complete the checkout process.

**Notes:** This test case covers a basic scenario of adding products to the cart and proceeding to checkout. Additional test cases can be created to cover variations such as adding multiple products, using different payment methods, and verifying order confirmation after successful payment.
