Description

Edit

Preconditions: Jenkins is running and the user is logged in

Steps:

1. Click on the User name in the Header
2. Scroll down opened page and click the REST API link
3. Verify redirection to the page with the title containing "Remote API" and link containing "api" in the URL
4. Click on the User name in the Header
5. Click on "Builds" button in the main menu
6. Scroll down opened page and click the REST API link
7. Verify redirection to the page with the title containing "Remote API" and link containing "api" in the URL
8. Click on the User name in the Header
9. Click on "Configure" button in the main menu
10. Scroll down opened page and click the REST API link
11. Verify redirection to the page with the title containing "Remote API" and link containing "api" in the URL
12. Click on the User name in the Header
13. Click on "My views" button in the main menu
14. Scroll down opened page and click the REST API link
15. Verify redirection to the page with the title containing "Remote API" and link containing "api" in the URL
16. Click on the User name in the Header
17. Click on "Credentials" button in the main menu
18. Scroll down opened page and click the REST API link
19. Verify redirection to the page with the title containing "Remote API" and link containing "api" in the URL
20. Click on the User name in the Header

20. Click on the user name in the header

Expected results:

User redirected to the page with the title containing "Remote API" and link containing "api" in the URL from different pages of the User area
